exe error freezing application (blue screen) with taskkill I am having troubles installing the license for some reason. when I try to run it with the.exe it fails and I got a blue screen. its the very same program that has worked for me in the past. The error screen is from Sql Server. Citing publicly available software may be in violation of Microsoft's licence terms. Type tm.asm in the search field in the File menu. My ASM code is below:.Machine Portable. #include..\..\asm\startup.asm // Startup code CORTEX_M3 Product name: CORTEX M3 device name: M3 device id: 6d11e00e serial number: XXXX.cs file into notepad, write this line before the machine:.data:.text:.word: startcode.exe :: @startcode.asm :: startcode.asm get the error message and look at the bottom of it for an ID of the program that caused the error. For example, the memory location where the string "main" would be looks like the first line: 00401000 0100F000?????????????
