Q: Oracle PL/SQL if then else if statement I have a stored procedure that I'm trying to code, however it's not working for some reason. The issue seems to be the 'CASE' statement, but I can't figure out why it's not working. The third 'CASE' statement is where the issue is occurring. It throws the 'ORA-04068: trigger raised too many errors'. Here is the stored procedure: PROCEDURE DEBUG(
P_ENABLED 82157476af
